Durashade™

Longer lasting style

For Home

A practical alternative to traditional vertical fabrics, Durashade™ rigid PVC vertical blinds are easy to operate and easy to keep clean. Available in 41 colour ways, over nine ranges, Durashade™ vertical blinds have all the style benefits of fabric but are also extremely durable and cost effective.

- Available in 3.5cm slats
- Wipe clean material
- Excellent closure - curved slat enables tight closure
- No requirement for bottom weight and chain
- Wholesale, made to measure or cut and punch service

Ideal for domestic and commercial markets

Durashade™

Longer lasting style

For Office

For the home

Durashade™ is a functional and versatile shading solution in any home. Excellent light control is provided as the vanes are curved, allowing the perfect ambience to be created. Durashade™ can provide complete privacy, or can be pulled back tightly providing a clear view of the exterior. The wide range of colours and textures enables the blind to have the look of fabric with the durability of PVC.

For the workplace

Strong and durable Durashade™ proves an extremely cost effective window blind solution for any commercial environment. PVC does not easily support the growth of bacteria or mould, making it ideal for moist conditions, hospitals or health centres. The functional PVC vanes enable easy maintenance, whilst the curved vanes allow tight closure, perfect for computer environments. Being flame retardant to BS5867 Durashade™ is ideal for commercial use.
